Location: Bhopal, Madhya Pradesh

PROFESSIONAL SUMMARY

I am B.Tech Information Technology graduate and aspiring Data Analyst / SQL Developer with hands-on project experience in SQL, PostgreSQL, Python-based data analysis, data cleaning, validation, and visualization. Skilled in working with structured datasets and presenting findings through reports and dashboards. Seeking a fresher or entry-level opportunity to apply analytical and database skills.

EDUCATION

B.Tech – Information Technology | Graduation: 2026
University Institute of Technology, Rajiv Gandhi Proudyogiki Vishwavidyalaya (UIT-RGPV), Bhopal

TECHNICAL SKILLS

SQL & Databases:	SQL, PostgreSQL, MySQL
Programming & Analysis:	Python, Pandas, NumPy
Reporting & Visualization:	Excel, Power BI, Matplotlib, Seaborn
Tools:	VS Code, Jupyter Notebook, Git, GitHub
Core Skills:	Data Cleaning, Data Validation, Exploratory Data Analysis (EDA), Data Visualization

WORK EXPERIENCE

Logistics Data Analyst Intern | YuvaIntern
Remote / Bhopal, Madhya Pradesh | July – August 2026

- Processed and cleaned e-commerce logistics data using Python (Pandas, NumPy); explored delivery bottlenecks and carrier SLA compliance.
- Analyzed route and fulfillment patterns and derived logistics KPIs to support last-mile delivery insights.
- Worked on shipment-delay and estimated-arrival-time analysis using data analysis and predictive modelling techniques.

PROJECTS

1. Food Delivery Data Analysis

- Analyzed food delivery data to examine order trends, customer ratings, delivery performance, and revenue patterns.
- Used SQL queries to calculate KPIs such as total orders, customer revenue, and average ratings, and created an interactive dashboard to communicate findings.

2. Customer Segmentation Analysis

- Cleaned and explored customer data to identify segments based on purchasing behavior and spending patterns.
- Performed exploratory data analysis and customer profiling, then visualized trends to support data-driven marketing and business decisions.

3. Netflix Movies & TV Shows Data Analysis

- Performed exploratory data analysis on Netflix titles by content type, release year, country, and ratings.
- Used charts to communicate patterns and summarize the distribution of titles in the dataset.

4. Data Quality Automation

- Built a data quality monitoring workflow using PostgreSQL and Python to detect missing values, duplicate records, and orphan records.
- Automated validation checks, generated Pass/Fail results, counted failed records, and produced CSV reports and a data quality scorecard.

5. Retail Sales Data Analysis

- Analyzed retail sales data to identify sales trends, top-performing products, and monthly revenue.
- Cleaned and analyzed data and created an interactive Power BI dashboard to present business insights.
